

Al Raja School

2016-2017 School Year

Worksheet for Scholastic Prices

In years past, prices have been in US Dollars. Scholastic has changed their price structure for non-US schools, and we now order in British Pounds. To calculate the total cost to you:

1. Add up your total for all items you would like to order
2. Multiply the total by 0.8
3. Round the total up to the nearest 100 fils

Example:

Total for all Items in Pounds		5.45
	x 0.8	<u>x 0.8</u>
Total in Dinars		4.36
Rounded up to the nearest 100 fils		4.4

In the above example, your total price paid would be BD 4.4.

Please use the worksheet below to calculate the price you need to pay in Dinars.

Total for all Items in Pounds		
	Multiply by 0.8	<u>x 0.8</u>
	Total in Dinars	
	Rounded up to the nearest 100 fils	

This order should be returned to your son's/daughter's teacher before Monday, January 16, 2017.
